## Professional Summary

Data Engineer and Scientist with 1.5+ years of experience in building scalable data pipelines, machine learning deployment, and AI architecture. Expert in transforming raw data into predictive insights and managing cloud-based ETL workflows using Python, SQL, and GCP. Focused on leveraging Agentic AI and robust data structures to solve complex analytical and business challenges.

## Technical Skills

**Languages:** Python, R, SQL, Node.js

**AI & ML Frameworks:** TensorFlow, Keras, Scikit-learn, OpenCV, LSTM, Random Forest, Agentic AI, NLP

**Data Engineering:** Pandas, NumPy, MongoDB, MySQL, GCP, Docker, ETL Pipelines

**Tools & Concepts:** Git, REST APIs, DBMS, Data Structures, Conversational AI

## Work Experience

### Data Engineer

Jan 2026 – Aug 2026

*Amealio*

*Pune, MH*

- **Pipeline Architecture:** Designing and maintaining scalable data pipelines to power real-time platform features and enterprise AI initiatives.
- **Data Optimization:** Enhancing data quality protocols and cloud architecture to ensure high-performance reliability for advanced analytics.
- **Strategic Implementation:** Contributing to the long-term AI strategy by orchestrating reliable data access and storage solutions across GCP.

### Software Engineer (AI Department)

Sep 2025 – Jan 2026

*Askimo.ai Solutions*

*Pune, MH*

- **Voice AI Integration:** Spearheaded custom Voice AI Agents using Speech-to-Speech (S2S) engines for fluid, low-latency interactions.
- **Workflow Automation:** Architected self-learning Agentic AI workflows to automate customer journeys, drastically reducing manual support dependency.
- **Backend Scaling:** Built high-throughput backend services utilizing Python/Node.js and managed scalable containerized deployments.

### Junior Data Engineer

Dec 2024 – Aug 2025

*NavAdr Solutions*

*Pune, MH*

- **Predictive Analytics:** Engineered end-to-end ML pipelines for Churn and Project Completion prediction, consistently maintaining 89-90% accuracy.
- **Recommendation Systems:** Developed a skill-gap recommendation engine with 92% accuracy via collaborative filtering, alongside automated support ticket triage.
- **Model Optimization:** Refined sales targeting using Random Forest models, achieving a robust 0.92 F1-score through GridSearchCV hyperparameter tuning.

## Key Projects

### Healthcare Chatbot (Voice-Enabled) | Python, LSTM, NLP

- Architected an LSTM-based conversational AI model capable of detecting preliminary symptoms with 85% accuracy.
- Optimized inference speed by 15% and diagnostic relevance by 25% via rigorous tuning and natural language parsing.

### Human Activity Recognition System | Python, Time-Series, Deep Learning

- Developed a robust time-series classification model using LSTM, achieving 95% accuracy for distinct human activity identification.
- Boosted data processing speed by 40% and overall model stability by 30% through comprehensive pipeline refinement.

## Education

### B.Tech in Artificial Intelligence and Data Science

Jul 2021 – Jun 2024

*CSMSS Chh. Shahu College of Engineering, Aurangabad*

*CGPA: 7.94/10*

## Certifications

**Gen AI:** Career Essentials in Gen AI (Microsoft) | **ML:** ML for Data Science (LearnBay) | **IoT:** NPTEL
